

## Fedex Day #3

Step 1: Three unique videos.

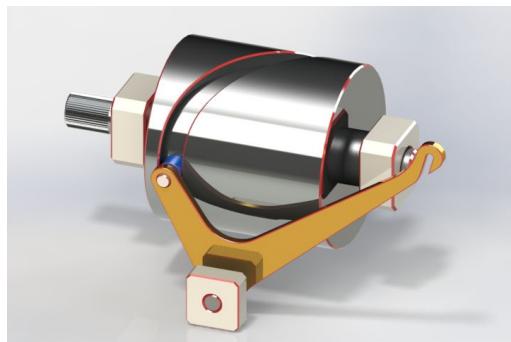

<https://youtu.be/2VTPYHNazns> -Clapping Automata

<https://youtu.be/j7XH3cXPHMY> -Biking Automata

<https://youtu.be/XM8bbjPWgv0> -Horse Running Automata

Step 2: The reason behind choosing these videos is because they were each unique from one another but still were essentially the same idea. I found it quite interesting that these devices moved without batteries, but instead by human force.

Step 3: Three different types of cams, labeled.

Cylindrical(Barrel) Cam

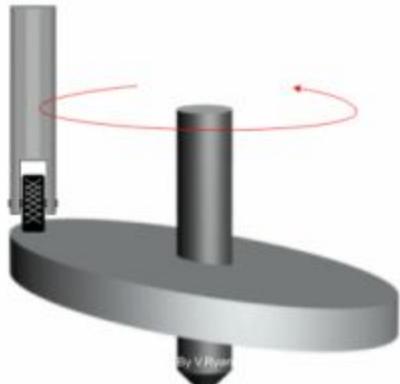

Plate Cam

Roller Cam

Step 4: Sketch of original Automata.
